ProSurf For PC

- Construction of NURB Surf geometry
- Construction of surfaces and solids of different profiles
- Degree of freedom to move in the X, Y and Z coordinates
- Curves with slope, smooth or textured
- Construction of textures
- Adjustable lighting and visibility
- Sensitivity to user-defined color
- Various angle modes for surf geometry and solid surfaces
- Surfaces with dynamic and animated changes, such as waves, waves, weather, shadows, and lightning
- Supports the scale model of various structures
- Exporting to IGES, STL, BGLD, VRML, PDF, KDM, JPG, TIF and XML formats
- Conversion to other CAD programs
- Transparency control for ships with more than one structure
- Export with some limitations to SketchUp format
- Simultaneous work on six different datasets
- Surf shape editing of NURB surfaces, trimming and re-mapping
- Surf integrity logic, ensure the accuracy of models of structures with abrupt changes, such as aircraft bodies, car frames and hulls
- Swapping of planar surfs to faces and vice versa
- Optimized implementation of node modeling algorithms
- Customizable measurement units for the setting of the length of the model
- Trimming of the hull along the bottom, top and side with the use of an independent surf
- Viewing the model in the style board after the trimming
- Finishing the surface model with the use of a 2D editor, color, texture, symmetry and animations
- Face smoothing tools for surfing
- Surfing of the hull, trimming and re-mapping of hulls
- Extensive camera system
- Multi-window mode
- All the necessary tools to create a model can be used from any part of the sea
- A set of features to show and construct a model from the back
- Two-way flipping mode to flip parts of the model
- Ability to edit and synchronize the position of the camera
- Various visibility and lighting modes
- Various lighting options
- Customized render mode with the use of cameras and lights
- Texture import for dynamic animation of the external and internal models
- Export to various formats, including selection of format
- Ability to preview the models in various ways to quickly understand the general mood of the model
- Line-out nodes or corner nodes, FOG nodes and corner rings can be used to calculate the flexibility and position of the model

What's New In?

ProSurf is a powerful application created for the designers that need to create 3D ship models. The program deals with relational trimmed NURB curve and surface 3D modeling. The program is customized for the design of any type of boat or ship and can be used by both professionals and sailing enthusiasts. ProSurf Description: This is the version for creating shapes of 3D surfaces. This software is using ADONIS commercial mathematical library. You can use the popular NURBS for 3D shaping of 3D models. It has the possibility to work with files in other formats. This software is a ideal tool for the 3D representation of ships and boats. Ship Creator is a rigid-body dynamics-based method of creating a surface model of a ship or boat. This application is based on the use of a CAD drawing, the creation of a free surface model, and the subsequent "mounting" of the model on the presented CAD drawing. The application is available in 2 main versions: Ship Creator Pro is an enhanced version of Ship Creator, with 3D modeling capabilities, command line interface, unlimited use and more. Ship Creator Classic is a rigid-body dynamics-based method of creating a surface model of a ship or boat. This application is based on the use of a CAD drawing, the creation of a free surface model, and the subsequent "mounting" of the model on the presented CAD drawing. The application is available in 2 versions: By the way, both versions can be used as: PC standard version Mac standard version Three of the available applications are included in the product as well: Right-click to select a file from the file system SHIFT and select a file from the file system Drag and drop a file to the window The application comes with 5 types of the surfaces: 2D 3D Bezier Quadratic spline Non-uniform rational B-spline The application comes with 5 types of the curves: 2D 3D B-spline Quadratic spline Non-uniform rational B-spline We have done it the right way to start this project, meaning we have managed to make it consistent and readable. Once you start to edit the model with our editor, be it CVX or N

System Requirements For ProSurf:

Minimum: OS: Windows 10 (64-bit) Processor: Intel Core 2 Duo (2 GHz or faster) Memory: 1 GB RAM
DirectX: Version 9.0 Hard Drive: 1 GB available space Sound Card: DirectX compatible sound card
Additional Notes: It's recommended that you have a DirectX compatible sound card. You can find out
if your sound card is DirectX compatible by visiting the manufacturer's website. Additional Notes:
DirectX compatible sound card
